LIDO / LIDO GRAND

LIDO

Inspired by the Italian word for beach, **LIDO** captures the elegance of life by the water. From the legendary **Lido di Venezia** to the refined beach clubs of the 1920s, the name evokes sophistication, style, and serenity. The **LIDO** model by **Compass Europe** translates this timeless atmosphere into **modern pool architecture**. Its **grand, full-width steps** and **broad shallow** area recreate the gentle slope of a natural shoreline – a design where functionality and aesthetics flow seamlessly together. Designed in response to the growing demand for **generous shallow zones** and **step designs**, **LIDO** offers space to relax, play, and connect – the essence of refined outdoor living.

LIDO GRAND

Building on the **LIDO** design, **LIDO GRAND** introduces a **dual-step configuration** that enhances both functionality and freedom of movement. Its **symmetrical layout** creates multiple zones for relaxation and play, while the central swim corridor provides the perfect position for a **swim turbine** – designed for balance and continuous flow. It is the perfect union of **relaxation** and **performance, precision-engineered** for those who seek both **elegance** and **motion in perfect harmony**.

TYP	LENGTH	WIDTH	DEPTH
Lido 120	12,00 m	4,00 m	1,50 m
Lido 100	10,00 m	4,00 m	1,50 m
Lido Grand 120	12,00 m	4,00 m	1,50 m
Lido Grand 100	10,00 m	4,00 m	1,50 m

NEW

LED LINE

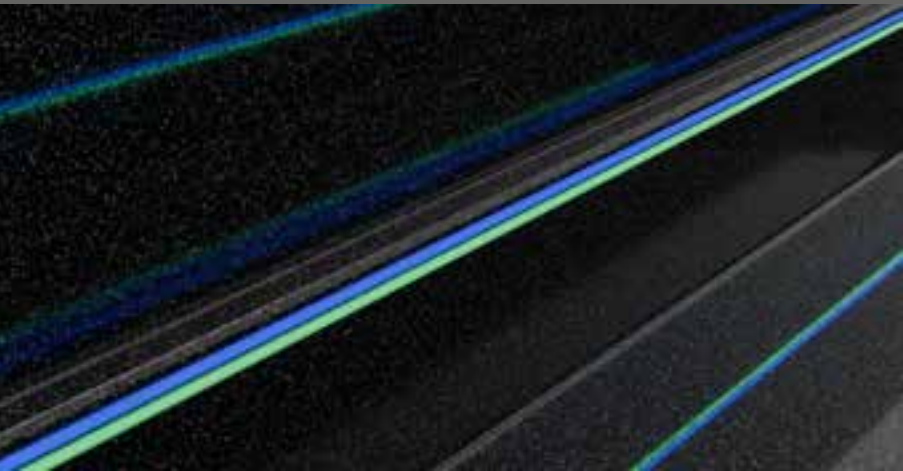

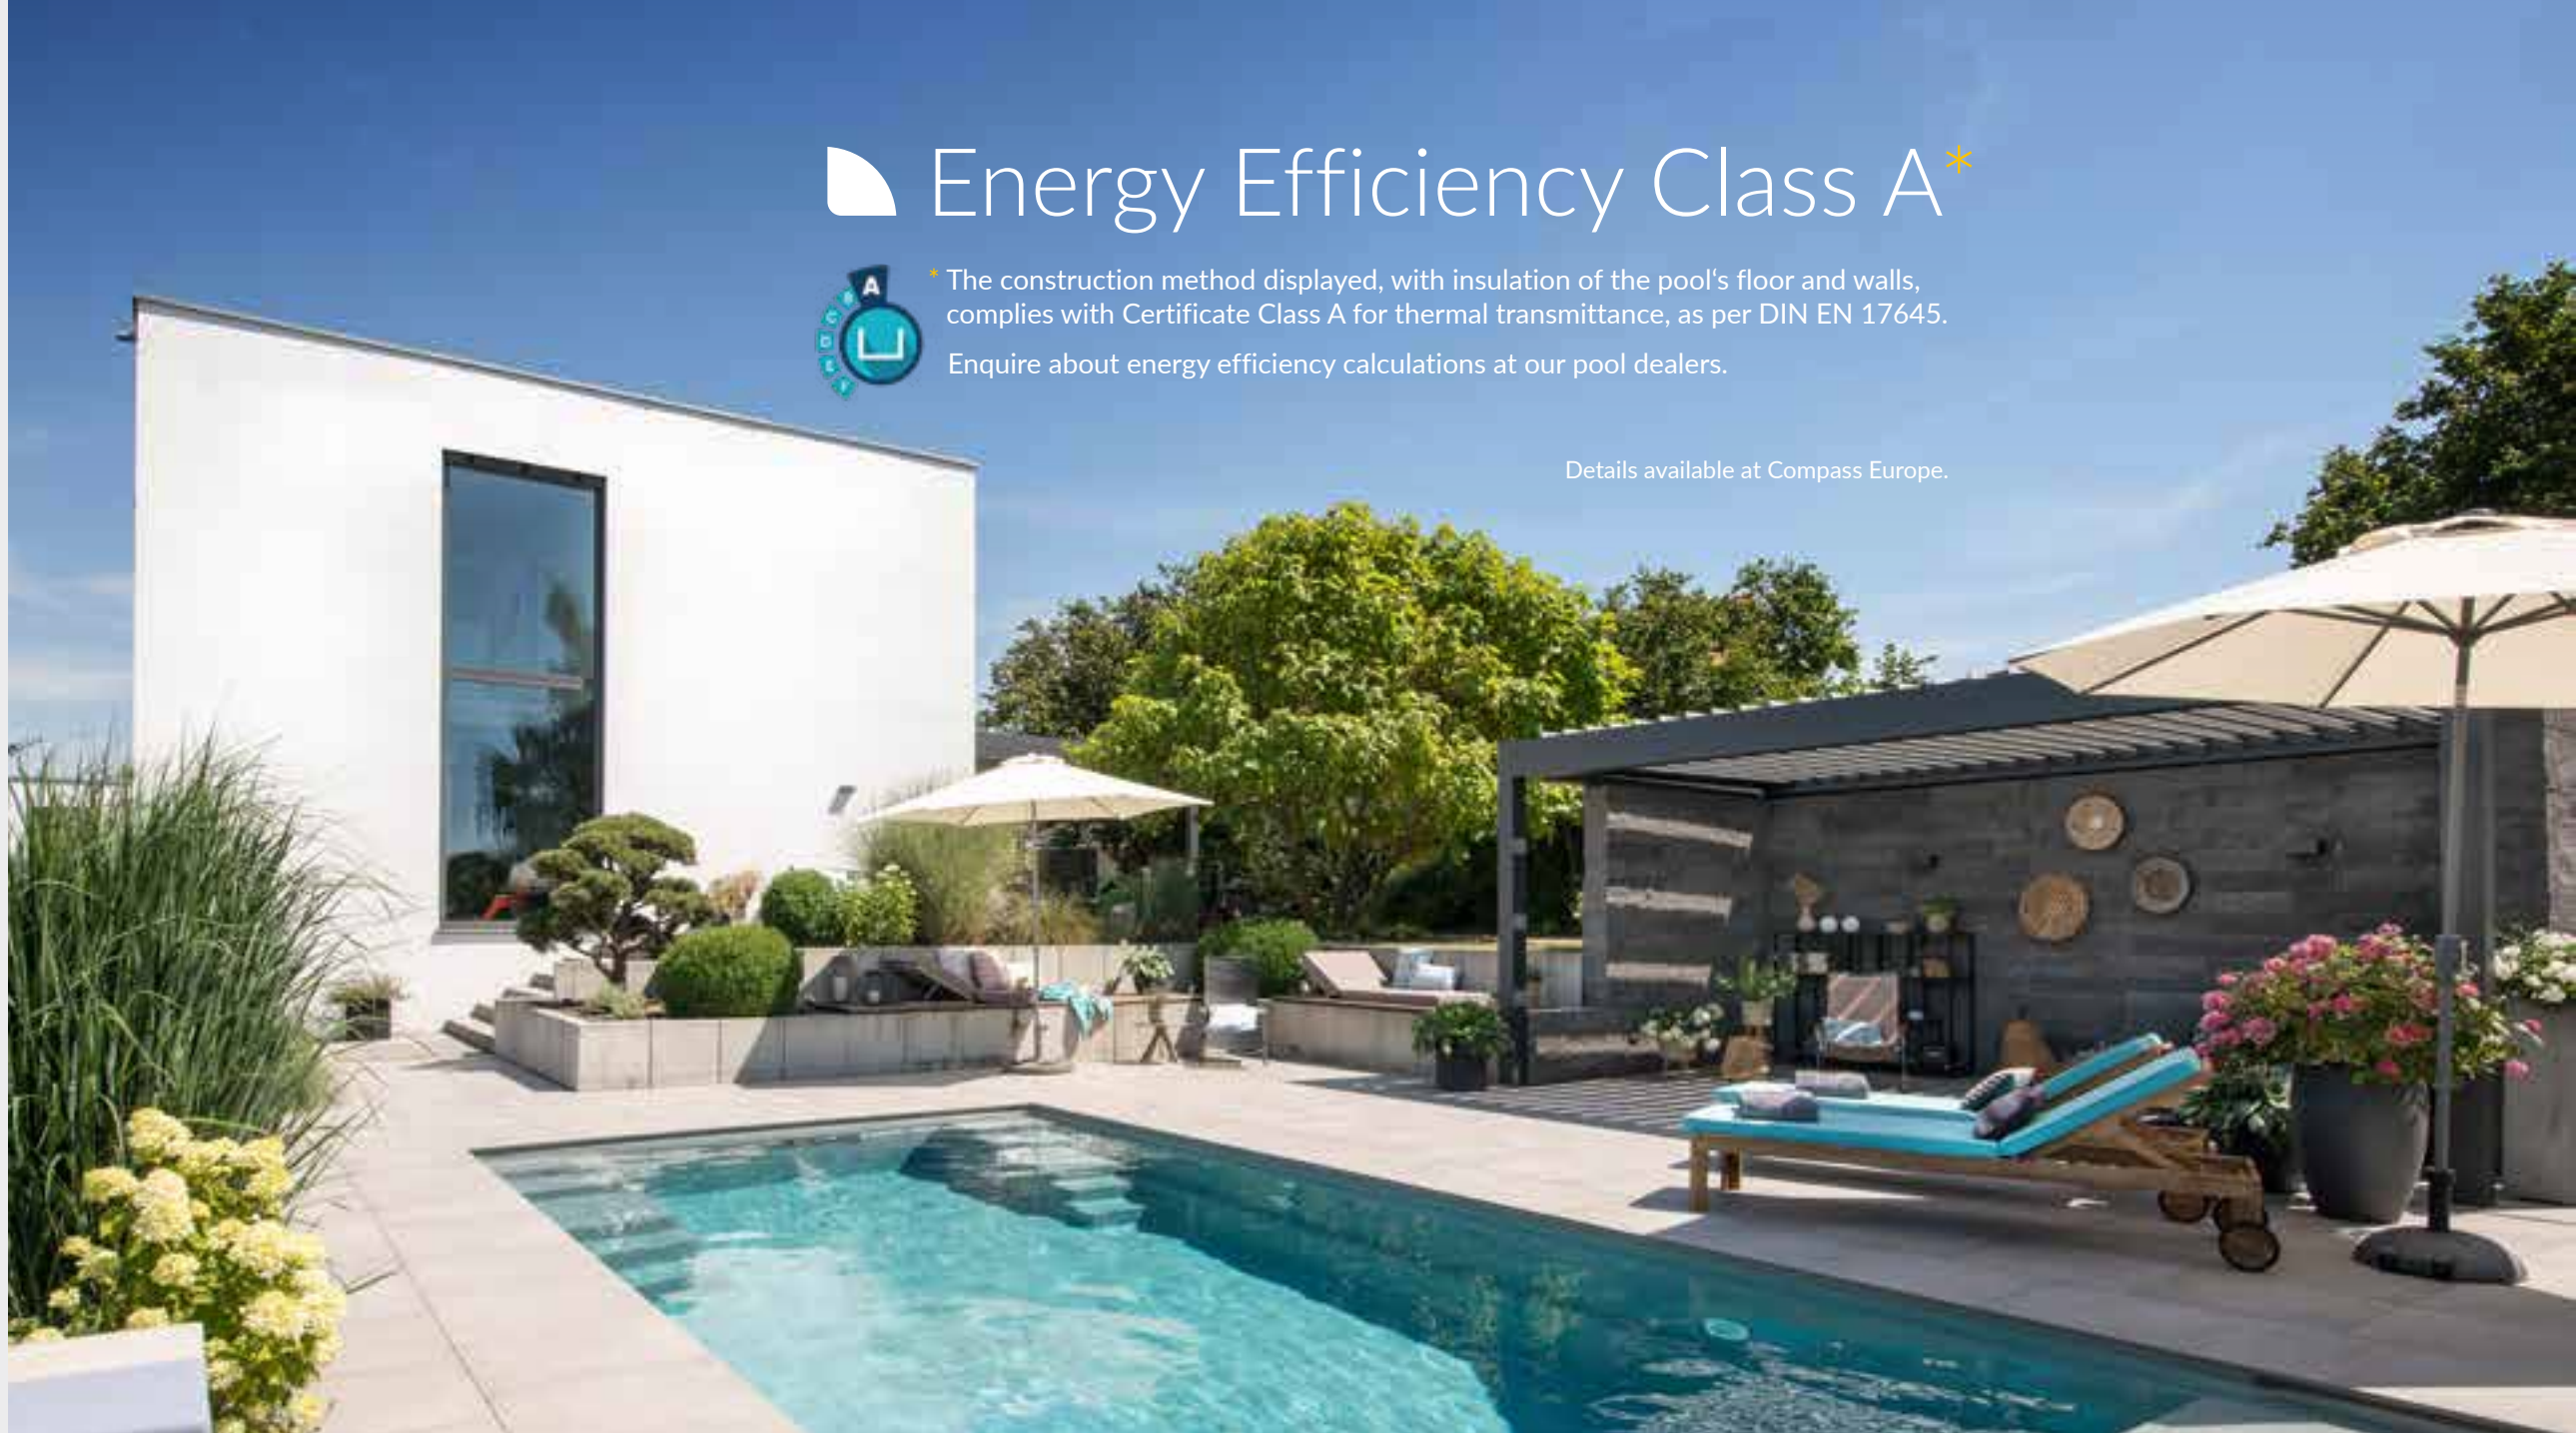

Precision Below the Pool Surface.

First presented as a concept at **Piscine Global Lyon 2024**, our discreet sub-surface LED solution advances proven lighting technology to a higher technical standard.

After a year of engineering refinement and rigorous testing – including **thermal, stress, and leak simulations** – the system now meets the highest Compass standards for **safety, performance, and durability**.

The LED elements are securely embedded within the pool structure, delivering uniform illumination, lasting protection and a clean, minimalist appearance.

Energy Efficiency Class A^{*}

^{*} The construction method displayed, with insulation of the pool's floor and walls, complies with Certificate Class A for thermal transmittance, as per DIN EN 17645.

Enquire about energy efficiency calculations at our pool dealers.

Details available at Compass Europe.

INNOVATION & TECHNOLOGY

COMPASS POOLS PIONEERING THE WORLD'S CUTTING-EDGE CERAMIC TECHNOLOGY

In the mid 90's, when Compass Pools introduced ceramic technology to the pool industry, it quickly became the recognised technology around the world. For decades, we have been recognised as a world leader and innovator in the market.

Advantages

- Over 35 individual pool shapes
- 82,000+ pools sold worldwide
- **Carbon-CeramicCore** – Higher resistance to ground movements
- **Armourshield+** Improved formula for even greater stability and durability
- **Maximum protection** against chemical decomposition and UV damage
- **Exclusive**, radiant three-dimensional gloss
- **HydroPro** – protection against hydrostatic damage
- **High-Level Skimmer** – for the highest water level in the industry
- Enhanced design customization options
- Installation possible without a concrete base plate – **fast and efficient**
- **40-year** factory structural warranty and against osmosis

CARBON

CARBON CERAMIC POOLS®

- Features
- even more strength (20 %)
 - even higher stability
 - even better manipulation

The additional use of carbon in the patented Ceramic System reinforces the structurally highly stressed areas of the pool.

Carbon has the highest pressure resistance of all reinforcing materials. The same high strength material found in automotive, marine and aerospace components is used for the our pools.

Carbon Ceramic layer

Improved formula for even greater stability and durability

SELF-CLEANING POOL

Imagine a pool that cleans itself, saves money and uses fewer chemicals.

A spring in the mountains is a symbol of purity and freshness. What is the reason for this? It is in constant motion. The mountain stream takes dirt and dust with it. Since the water circulates, algae and bacteria have no chance to grow. Of course you can achieve the same effect in your pool – through the Vantage self-cleaning system.

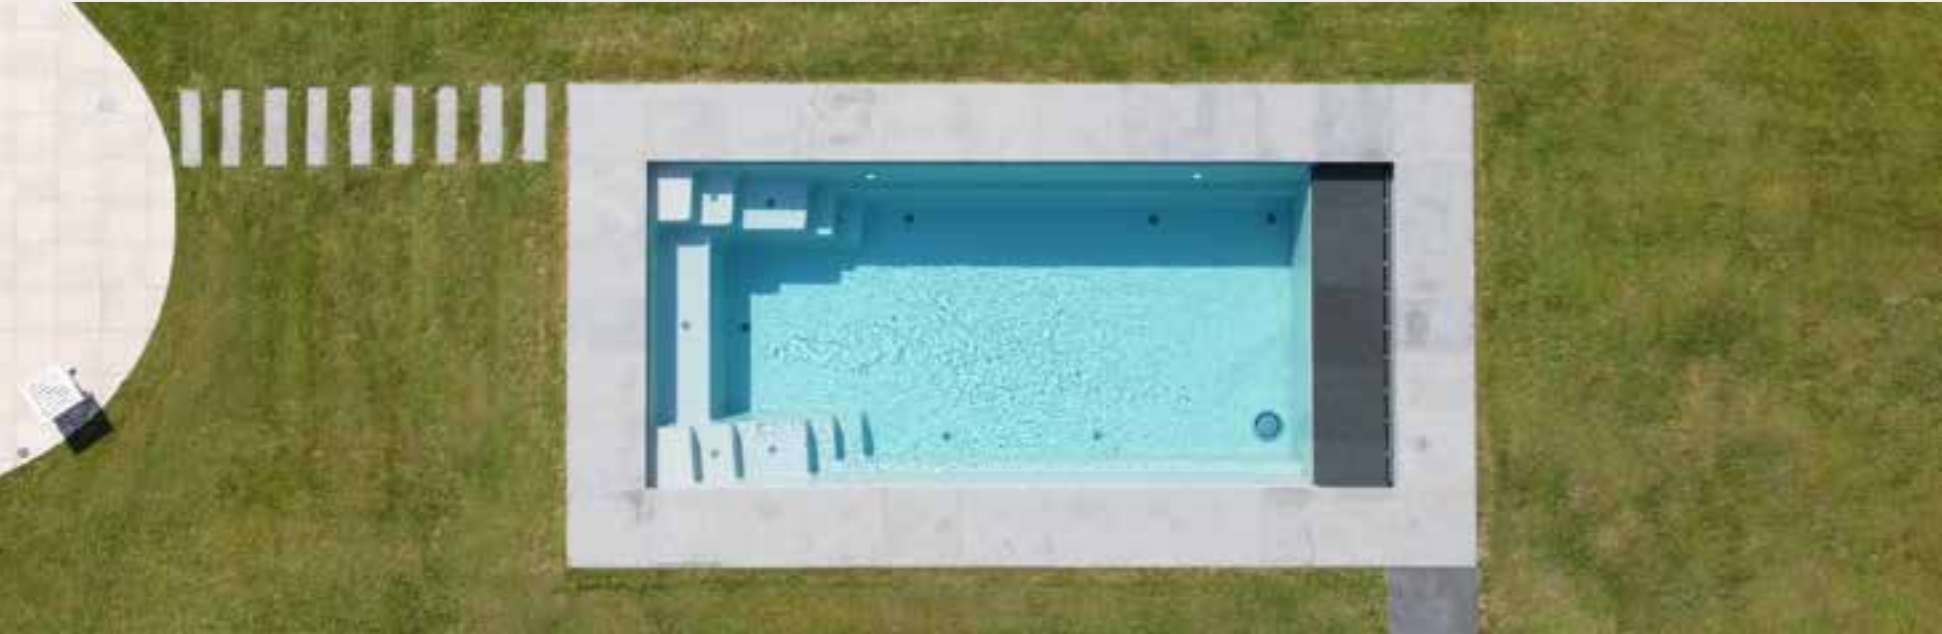

VANTAGE is the world's best circulation and cleaning system and is unsurpassed as a pool cleaner. The Vantage system cleans more effectively and more efficiently from the surface to the bottom of the pool. The Vantage system is almost invisible and does not affect the appearance of your new and beautiful swimming pool. The Vantage system comes in two different nozzle and bracket colours to match your pool colour.

If you want to relax next to your new pool, choose the Vantage system.

Key advantages

- self-cleaning of the pool up to 80 %-90 %
- better water circulation & pool hydraulics
- less disinfectant required
- no more manual cleaning (e.g. filter bag) required
- more time to relax and unwind

COMPASS SWIM

COMPASS SWIM – THE ALL-ROUNDER AMONG THECOMPASS POOLS

Regardless of whether it is installed in-ground in the garden or above-ground and installed as a self-supporting pool on the terrace. CompassSwim is suitable for both types of installation. With its compact sizes, there is room for the CompassSwim on many terraces. Equipped with massage jets and a turbine system, the CompassSwim can be used as a whirlpool and swimming pool in one.

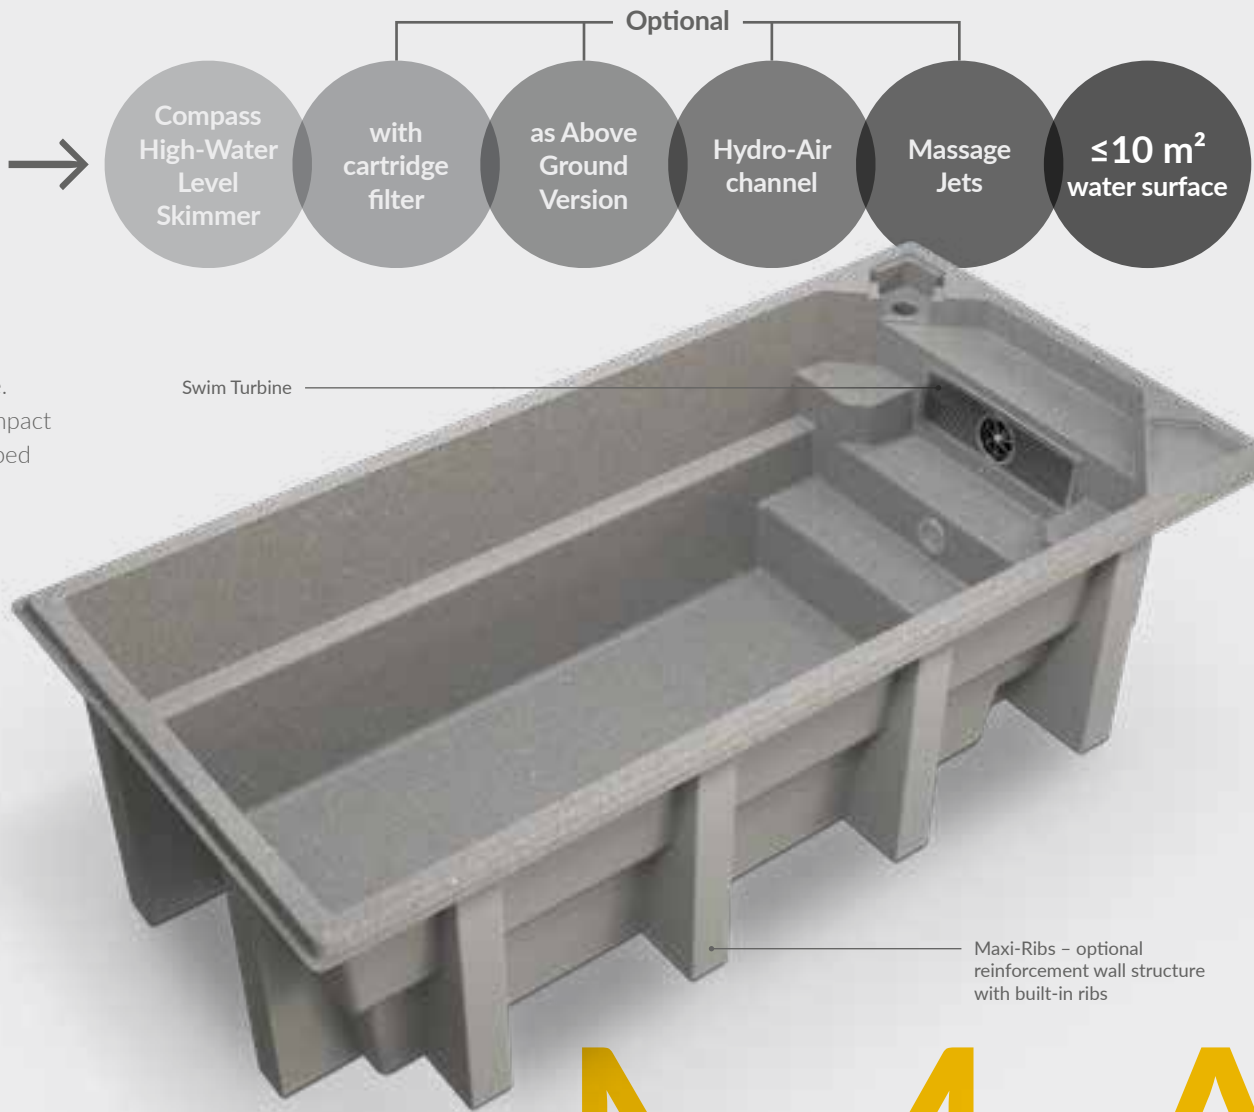

Build your private **passive pool**.

In combination with an energy-saving pump and photovoltaic system, the CompassSwim can be used as a passive pool. You can decide independently whether your passive pool is operated with a sand or cartridge filter. CompassSwim can do both.

OVERFLOW

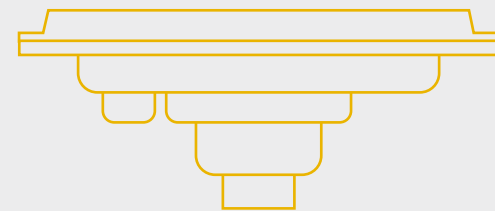

HIGH LEVEL SKIMMER

EMBEDDED HIGH-LEVEL-SKIMMER

The high-level skimmer (surface suction) integrated into the pool wall enables a very high water level just below the pool edge – close to Infinity design. The high water level ensures an exclusive and elegant appearance of the swimming pool installation. The skimmer is integrated in the production process, so no separate flanges and cut-outs in the pool wall are necessary and the stability of the pool is not affected in any way.

COLOUR MATCHED OUTLET

Special barrier-free swimming pool floor drain in the colour of the pool – no elevation (no flange – but firmly laminated) in the pool area!

In addition, we offer the complete accessories such as a counter-current system, spotlights, stainless steel trim, and a level adjustment.

COMPASS ROLLO COVER BENEFITS

- Guarantees maximum energy efficiency and full safety
- solar lamellas provide optimum heating of the swimming pool water of an additional 4°-8°C
- during the night, evaporation and thus heat loss are reduced to a minimum
- uniquely high water level – thanks to laminated high-level skimmers

MOSAÏQ unites tradition and innovation—inspired by the French mosaïque, where countless small elements form a harmonious whole. **MOSAÏQ** is **Compass Europe's** newly introduced pool collection. Every pool we produce follows the same principle: design, materials and technology come together with exacting precision. The mosaic surface is applied in a tightly controlled production process to ensure a uniform finish, long-term durability and a refined appearance. Engineered on **Ceramic Core technology** and **reinforced with Carbon**, each model is delivered installation-ready—for consistent quality, reliability and significantly shorter installation times. The letter 'Q' embodies our design DNA: modern precision, architectural clarity and a commitment to lasting quality.

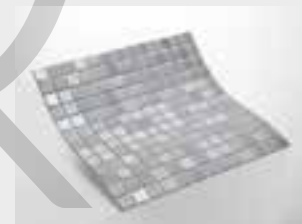

The **MOSAÏQ Pool Collection** pairs bespoke configuration with consistent, factory-grade precision—covering step layout, cover options, pool geometry and dimensions, skimmer or overflow system, mosaic, lighting, equipment and an acrylic viewing panel. After the planning consultation, your pool is manufactured entirely in the factory and delivered as a monoblock—pre-fitted with all built-in components and your chosen mosaic, and factory-tested—so on-site work is limited to placement and service connections, enabling swift commissioning.
